

## Resize Perc 6 i Raid-Array without new OS installation

---

First of all: we give no warranty, all operations can distroy your Data!  
Do it on your own risk

- 1) Get a backup of your data.
- 2) change old HDD one by another to bigger ones, REBUILD every HDD before you change the next !  
(Rebuild each large drive to array.)
- 3) After all rebuilt Delete array (VD by running ctrl R command etc.) .
- 4) After the array has been deleted then do a Retag array (create new VD, same RAID level, same Name)
- 5) **Do NOT** init the virtual disk !!!!!!!!!!!!!
- 7) run a live OS-CD and resize your partition

That's all,  
good luck
